

## **KBMM Post Treatment Brow Aftercare**

*Permanent make-up will always lead to minor skin trauma. Therefore, it is important to follow the aftercare advice to carefully and gently nurture your skin after the treatment to allow healing without complications. Inadequate care in healing phase of the skin can lead to poor results and KBMM cannot be held liable for it. 70% of healed results can be down to after care.*

**In the next seven days you are required to pay attention to the following:**

### Day of treatment

Half an hour after the end of the treatment:

- 1 - Wash and dry hands well
- 2 - Eyebrows should be gently cleansed well with the Phi aftercare wipe / lukewarm sterile water and patted dry.
- 3 – Apply a rice grain amount skin candy/ ointment provided in an extremely thin layer.
- 4 - At bedtime repeat above steps and apply the sleep patches (remove backing, place so brow can be seen through white paper window. Then remove white paper frame so only film remains)

*This procedure should be repeated every hour, or at **least 5 times in the first day ( 24 hours )** to prevent scabbing. This ensures lymph is removed before it has the chance to dry and form a scab.*

### Day 2 - 8

Morning - repeat step 1 and 2 from day of treatment instruction above

Bedtime - repeat step 1 and 2 from day of treatment instruction above

Use the balm very sparingly. Heavy application or overuse of the balm will:

- lead to blurring and fading of the strokes
- prevent your skin from breathing.

**If you are unsure or have even slightly oily skin, it may be best to stop using the balm after 4- 5 days.** It is important to cleanse the brows to maintain skin hygiene and avoid a risk of infection.

For post-treatment care, use only the provided cream or if an emergency pure Coconut oil. Please do not use any other creams except the ones provided to you in order to prevent possible infections or allergic reactions.

***In the first 8 days minimum after the treatment, avoid:***

- Makeup in the brow area
- Immersing brows in water
- Steam (from baths, kettles, dishwasher etc)
- Sun exposure, tanning beds, sauna, facial beauty treatments

- exercise accompanied by sweating (sport, activities etc.)
- contact with the dust (household or garden chores, etc.).

***In the first 30 day avoid:***

- Sun exposure, Light therapies, Fruit acids, chemical peels microdermabrasion, regenerating creams,

***Always avoid (in treated area) :***

All Laser or IPL treatments as they will destroy pigments, and could cause burns.

*Ketna Butron Makeup and Microblading* is not liable in case of improper post-treatment care.
